DOLLIES

Chapman Leonard has provided camera dollies to the motion picture industry for over seven decades and has become the premier equipment supplier for award winning production sets. Chapman UK now stock the brand new Series 5 dolly range including Pee Wee, Hybrid & Hustler - available now.

Pee Wee III+

Fits through a doorway as small as 16" wide. Conventional and crab steering modes with pneumatic, soft and hard tyre options. Hydraulic lifting arm.

Pee Wee IV+

Revolutionary three-mode transmission with conventional, crab & round steering modes.

Pee Wee V

Built in battery for power on the move.

Cobra

Compact design ideal for small spaces. Easy to carry with removable centre post and low maintenance.

Flatbed Dolly

Also known as Skateboard dolly.

Hybrid III & III+

Incorporating features of the Pee Wee & Hustler. The mid-size dolly in the Chapman range.

DOLLIES

Hybrid IV

Greater payload and improved bearing system. New built-in 4 way levelling head.

Hybrid V

On board battery allowing up to 50 charges.

Hustler IV

Greater payload and improved bearing system. New built-in 4 way levelling head.

Hustler V

Larger hydraulic capacity that requires less recharging & can handle higher payloads.

Matador Dolly

Ideal for a low shot on track without use of more complicated dollies or skate troughs.

Western Dolly

Ideal for low shots both on and off track.

DOLLY WHEELS

Chapman dollies come with standard wheels, but if you are shooting outside of a studio or on rougher terrain, many models have alternative wheel options

- Soft Compound

- Pneumatic

- Boogie

SERIES 5 DOLLIES

The Chapman Leonard 5 Series dolly lineup is an impressive array of dollies that offer a range of features and accessories for the dolly grip. The Super Peewee 5, Hybrid 5, and Hustler 5 are all equipped with a lithium battery for reliable and uninterrupted power. With USB and XLR ports, these dollies are designed to be versatile in supplying power in a variety of applications.

PEE WEE V, HYBRID V & HUSTLER V AVAILABLE FROM CHAPMAN UK NOW

TELESCOPIC CRANES

Capture the shots with Chapman Leonard's telescopic cranes which provide your team with industry leading versatility and compatibility. Chapman Hydrascopes are waterproof, making them ideal in rain effects, whilst our brand new 23' & 45' Scorpions allow for automatic arc compensation. Browse our products.

15' Hydrascope

The smallest in the Hydrascope range.

20' Hydrascope

Ideal for use in compact studio spaces

23' Scorpio

Soft, silent and effective camera movements true to telescopic arms. It features aluminum arms to increase rigidity and be more uniform.

32' Hydrascope

Fully submersible telescopic crane when used with sliding weights system. Pair with the Amphibian Remote Head for spectacular underwater shots.

40' Hydrascope

Our most popular and versatile Hydrascope. Pair with the Chapman Mini Raptor for ultimate versatility.

45' Scorpio

The perfect compromise between the maximum distance of telescopic travel, the best movement of the arms & the highest possible load for the standard needs of a running-in.

TELESCOPIC CRANES

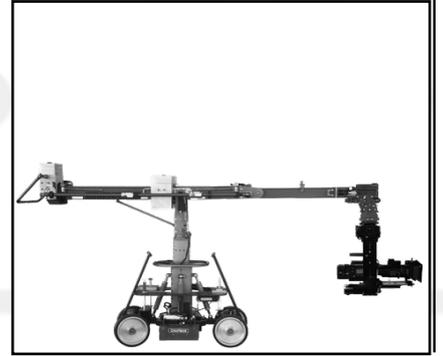

52' Hydrascope

Waterproof and compatible with our Super Raptor mobile base for total versatility.

73' Hydrascope

Our largest Hydrascope, compatible with tank tracks for access to the most

Miniscope 5

Compact for use in small spaces.

Miniscope 7

Can be electronically or manually telescopic, Hand held "pickle" allows easy control of ramping, speed as well as start and stops.

Stinger I

Compact and lightweight jib arms

Stinger II

VTR

Fully telescopic vertical travel for smooth height in an instant.

SCORPIO 45' ON ECS BASE

The Chapman ECS Base has been specially adapted to carry a Scorpio 45' for electric movement and smooth height changes, on a smaller footprint than the Scorpio base. The Scorpio 45' is also adapted for use on the Super Raptor for use in outdoor locations.

MODULAR CRANES

Mini Lenny

The Lenny Mini is one of the smallest among Chapman's line of crane arms. Tight spaces, such as a car window or doorway are typical, but certainly not the only applications for this arm.

Lenny II

Lenny Arm II Plus is a perfect unit for most production needs. Accessories, such as cables and a variety of buckets, add remarkable versatility.

Lenny III

Despite an impressive reach and payload, the Lenny Arm III is easy to transport and assemble because of the carry handles that run the length of each 5ft section.

CRANE BASES

Raptor

This base offers efficient repositioning of telescopic cranes and fixed cranes with its auto leveling feature. Compatible with the 40', 32', and 20' Hydrascopes, as well as the 23' Scorpio.

Mini Raptor

For a smaller footprint than the Raptor, ideal for outdoor locations.

Super Raptor

Positioning in tricky locations for our heaviest duty cranes as well as the 40' Hydrascope, 45' Scorpio & 50' Hydrascopes.

CRANE BASES

Rhino

All-terrain access for cranes in difficult locations

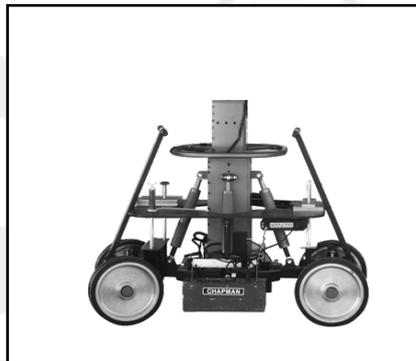

CS Base

ECS Base

Tank Tracks - 70'

Mini Base

All Terrain Base

73' HYDRASCOPE ON TANK TRACKS

Use the largest Hydrascope in our range on bespoke Tank Tracks for access and positioning in hard to reach locations. Designed for use in mud, sand and gravel.

TRACKING VEHICLES

We have tracking vehicle option for just about any filming scenario, terrain and location. Contact us for advice and guidance to achieve your shot.

FORD DUALLY

The Ford F350 Super Duty tracking vehicle is a strong and stable camera base with V8 5.7: Turbo Diesel 4 x 4

AUDI A3 PURSUIT CAR

3.2 V6 Petrol, DSG Auto Gearbox, 4 x 4 Quattro

NISSAN URBAN

4 x 4 2.5 TDi Utility Vehicle

ETV LK61FX

Electric terrain vehicle 4 wheel or 2 wheel drive

RACING QUAD FX62 HNY

Fast tracking quad, quick acceleration, uprated suspension

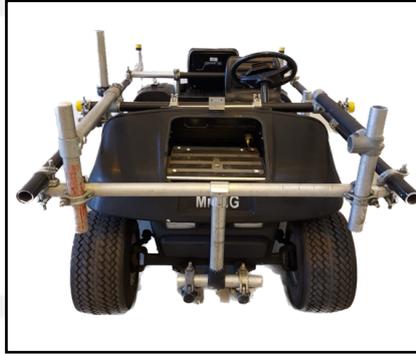

HONDA QUAD LK61 CYU

TRACKING VEHICLES

E QUAD LK15 EYW

Ideal for off road use, high and low range speed select

MR BIG

Electric powered, silent running, no fumes

TWIZZY/STEALTH DV12 VPY

YAMAHA YZR 450 CN19 ATF

4-Stroke petrol engine, electric start, smooth power delivery

ZERO 1 E BIKE LN62 HVP

Silent running, no gear changes, no vibration, or fumes

MEERKAT

POLARIS RZR

ELECTRIC TRIKE

SIDELINE

Olympian II

Drive system enables speed of 13 ft./sec Over 6 ft. of vertical camera travel Great for Football (or other sports) sideline coverage.

Sidewinder

Electric powered for smooth, silent operation in forward and reverse modes. Great for Football.

REMOTE HEADS

Remote camera heads for every scenario - from car chases to fully submerged underwater filming.

GIZMO PRIME

Full stabilisation in 2 or 3 axis.

AMPHIBIAN

The Amphibians ability to handle water dives do to its incredibly powerful motors and strong build makes it the head of choice for underwater filming. 2 & 3 axis.

O'CONNOR 2575

Counterbalance system for true, accurate balance at any point in the tilt range

G3

The G3 remote head has been a reliable choice for filmmakers and cinematographers over the years, even in the toughest of environments.

FLUID 7 REMOTE HEAD

Designed for use with film or video cameras up to 25KG.

AURORA

The Aurora Head sets up in minutes and does not require a special technician.

UNDERWATER FILMING

The Amphibian is a fully submersible head that is perfectly paired with the 32' Telescopic Hydrascope and sliding weight system. The Amphibian's ability to handle water dives due to its incredibly powerful motors and strong build makes it the head of choice for underwater filming. The camera plate is adaptable to all hydroflex water housings with its universal plate. The amphibian can be used in salt water as well making it an ideal piece of equipment for underwater filming project. Ask for the Underwater System to book the 32' Hydrascope, Sliding Weights System & Amphibian.
